

● ABOUT ME

Experienced Frontend Engineer with 2 years of expertise in web development, specializing in React.js and Ionic frameworks. Skilled in building dynamic, responsive user interfaces and integrating RESTful APIs to develop seamless web applications. Strong proficiency in HTML, CSS, JavaScript, and React.js, with a deep understanding of component-based architecture, state management using React hooks, and Context API. Proven ability to deliver high-quality, scalable web applications by leveraging modern front-end technologies.

● WORK EXPERIENCE

12/2022 – CURRENT Islamabad, Pakistan
FULL STACK DEVELOPER MERIK SOLUTIONS

- 1. Develop and maintain robust and scalable web applications using **ReactJS**, **.NET**, **SQL Server**, and TypeScript to enhance user experience and application performance.
- 2. Implement **ReactJS** components, services, hooks, and context management to optimize application functionality and maintainability.
- 3. Collaborate with back-end developers to integrate RESTful APIs and ensure seamless data flow between the front end and server-side components.
- 4. Write clean, modular, and reusable code following industry best practices such as DRY and SOLID principles.
- 5. Develop responsive user interfaces using **ReactJS** libraries, Bootstrap, and CSS frameworks for a seamless experience across devices.
- 6. Participate in Agile sprints, code reviews, and sprint planning meetings, contributing to continuous improvement of team productivity.
- 7. Troubleshoot, debug, and optimize applications for maximum speed and scalability

Key Achievements:

- Successfully migrated legacy applications to **ReactJS** and **.NET**, improving performance and maintainability by 40%.
- Developed a real-time data synchronization feature in a financial dashboard application using **RESTful APIs**, improving data accuracy 40% and responsiveness 60%.
- Enhanced UI components with **ReactJS** libraries, increasing user satisfaction and usability.
- Optimized SQL Server queries for faster data retrieval, improving backend performance by 25%.

06/2022 – 11/2022 Islamabad, Pakistan
INTERN (REACT JS DEVELOPER) MERIK SOLUTIONS

- 1. Assisted in the development and maintenance of web applications using Reactjs, TypeScript, and HTML/CSS, collaborating with senior developers to implement features and resolve bugs.
- 2. Supported the creation of reusable **ReactJS** components, services, and modules to improve code modularity and maintainability.
- 3. Integrated RESTful APIs and third-party libraries to enhance application functionality and improve user experience.

Key Achievements:

- Contributed to the development of a real-time notification system using Reactjs and Sql, enhancing the app's interactivity.
- Implemented lazy loading for Angular modules, which improved the overall load time and user experience of the web application.
- Designed and implemented a user-friendly login and authentication flow, reducing support tickets related to account access by 20%.

● EDUCATION AND TRAINING

09/2017 – 01/2022 Islamabad
BACHELOR IN WEB ENGINEERING Iqra University

● **LANGUAGE SKILLS**

Mother tongue(s): **URDU | PASTHO**

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	B2	C1	B2	B2	C2

● **DIGITAL SKILLS**

Javascript | HTML5 | CSS3 | TypeScript | SCSS | jQuery | Bootstrap | JSON | XML | REST | Git | MongoDB | RESTful APIs | Reactjs | Redux toolkit | Tailwind | Material ui | Context Api | ASP.NET / ASP.NET Core | C# | Entity Framework C# | DataBase Sql Server | MVC | Security (Authentication, Authorization, Secure Coding | Performance Optimization (Caching,Asynchronous Programming)

● **PROJECTS**

Bizfolio

Bizfolio is a cloud-based application designed to streamline the process of managing, sending, and signing documents. Built using **ReactJS** for the frontend and **.NET** for the backend, this platform enables users to create customizable, signable documents by adding draggable fields, allowing recipients to easily fill in required information. Bizfolio provides an intuitive and secure way to handle electronic document workflows, making it especially useful for businesses and legal professionals.

Cloud-Based Platform: BizFolio operates entirely in the cloud, ensuring easy access and secure document handling from anywhere.

Drag-and-Drop Fields: Users can drag and drop various input fields (e.g., text boxes, date pickers, checkboxes) onto documents, customizing them for each recipient.

Electronic Signatures: Recipients can sign documents electronically, eliminating the need for paper-based processes.

Text Editor Module: Developed the core Text Editor Module, enabling users to easily edit, format, and style text within documents, ensuring all content appears professional and tailored to the recipient.

Backend Integration with .NET: Implemented robust backend services with .NET to handle user authentication, document storage, and secure data management.

Real-Time Updates: Integrated real-time document editing and signing functionality, ensuring a smooth and responsive user experience.

Smart Home Solution Application

The **Smart Home Solution Application** is a comprehensive platform designed to manage and control smart home devices, providing users with an intuitive interface to monitor and automate their home environments. Developed using **ReactJS** for the frontend and **.NET** for the backend, the application focuses on delivering a seamless and responsive user experience. It allows users to control devices such as lights, thermostats, security cameras, and more, directly from their mobile or desktop devices.

Device Management: Developed a user-friendly interface to add, remove, and manage various smart devices such as lights, thermostats, and security systems.

Automation & Scheduling: Implemented features to automate device actions based on schedules, triggers, or user-defined conditions.

Real-Time Monitoring: Integrated real-time data tracking for device status and performance, providing users with live feedback on their smart home devices.

User Authentication & Profile Management: Built secure user authentication and profile management, allowing users to create and manage accounts with encrypted login and password recovery.

Admin Panel: Developed a robust admin interface using .NET for managing user data, device configurations, and application settings.

API Integration: Utilized RESTful APIs for seamless communication between the frontend (ReactJS) and backend (.NET), ensuring smooth data flow and device interaction.
