SUMMARY

I'm a skilled React.js Developer specializing in building modern, user-friendly web applications with full-stack expertise in React.js, Node.js, Express, and MongoDB. Proficient in HTML5, CSS (Bootstrap, Tailwind), and JavaScript, I create responsive, interactive interfaces. Experienced in collaborating on diverse projects with teams using Jira and GitHub, I focus on delivering impactful, efficient solutions.

EDUCATION

Virtual University

2021-2025

Bachelor's Degree in Information Technology

Industry Experience

GlaxIT Software House

2024-2025

As a React Js Developer

Axonyx Verse

2025-Present

As a React Js Developer

SKILLS

- Html / css3
- Bootstrap
- Tailwind
- Javascript
- React JS
- Next JS
- TypeScript

ACHIEVEMENTS

Employee of the Month (Performance Based)

During my inaugural internship, I achieved success by seamlessly translating a Figma design into a website application. My meticulous attention to detail ensured the project's completion, leaving the team delighted with the results.

CERTIFICATIONS

React Framework -Coursera

UI/UX -Coursera

Networking -Digiskills

Cyber security -Stanford online

PROFESSIONAL EXPERIENCE

Kahanify

- Developed Kahanify, an engaging audio storytelling platform for young audiences using React.js. Enabled immersive, interactive story experiences through dynamic soundscapes and seamless UI.

ServiceBricks

- Created ServiceBricks, an open-source platform designed to streamline the creation and management of microservices, using React.js.

ServiceQuery

- Built a front end of ServiceQuery, a robust solution for simplifying data queries over REST APIs using React.js. Supported both SQL and NoSQL databases while implementing strong security measures against injection attacks.

Holomodule

- Developed a cutting edge project leveraging advanced AI, AR, VR, and Cloud computing solutions using React.js. Delivered high-performance, scalable, and future-ready technology for impactful user engagement.

Asif MIS

- Developed an MIS system using React.js to help clients manage employee data, client information, and financial operations. Enabled streamlined tracking and reporting for improved decision-making and operational efficiency. Delivered a secure, user-friendly platform for comprehensive business management.

Hire Verified

- Developed a front end of Hire verified using React.js . In this system company hire a verified employ. In this project i also develop full support system of Hire verified using React js
