

RAJA ABDULLAH

Computer Scientist

+923175510676 @ rabdullah806@gmail.com Raja Abdullah Abbottabad, Kpk.

SUMMARY

Recent Computer Scientist Graduate with a solid understanding of software development and programming languages. Although I am not extensively experienced. I am actively learning and gaining practical knowledge in the field. Passionate about leveraging my knowledge in real world applications and eager to contribute to a dynamic tech team. Skilled in computer software with the experience of new technology.

EDUCATION

Bachlors of Science in Computer Science

COMSATS University Islamabad, Abbottabad

03/2021 - 01/2025 Abbottabad, Kpk

FSC

Progressive College Of Science Abbottabad

03/2018 - 05/2020 Mandian, Abbottabad

Matric

Army Public School PMA Kakul

03/2015 - 04/2017 PMA Kakul, Abbottabad

EXPERIENCE

Junior .Net Developer

Firnas.Tech

06/2023 - 12/2024 Mandian, Abbottabad.

- 1.5 years of experience as a .NET Developer specializing in ASP.NET, MVC, and .NET Core.
- Developed and maintained RESTful Web APIs for seamless integration with frontend applications.
- Expertise in backend support, database management, and Entity Framework for efficient data handling.
- Proficient in SQL Server and optimizing database queries for better performance.

SKILLS

Dotnet Development

Mobile Application Development

Web APIs

Backend Developer

Project Management

FINAL-YEAR-PROJECT

IoT Based Cattle Monitoring System

IoT-based Cattle Monitoring System provides an innovative solution to enhance livestock management by leveraging real-time monitoring, data analytics, and automation.

With a comprehensive scope, well-chosen tools, and a collaborative team, the project aims to improve efficiency and sustainability in the agricultural sector.

The adoption of an Agile development approach ensures adaptability and responsiveness as we work towards revolutionizing cattle farming with the SmartAgro system.

KEY ACHIEVEMENTS

E-commerce Website - Khareedo.Pk

Provided front-end and back-end support using ASP.NET MVC, HTML, CSS, and JavaScript. Implemented CRUD operations and optimized database interactions using Entity Framework. Ensured seamless user experience and efficient data management for the platform.

Prayer Times Management System (Full-Stack Development)

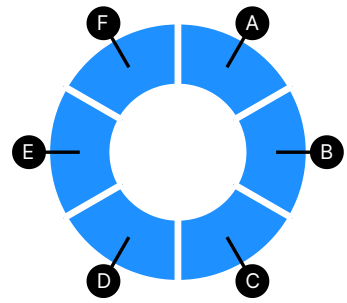

Developed a full-stack **ASP.NET Core MVC** web application for **admin panel management** of prayer times, integrated with a **mobile app**. The admin can **log in securely**, update prayer times, and manage schedules efficiently. The system ensures **real-time synchronization** with the mobile app, providing users with the latest prayer timings. Implemented **SQL Server for data storage** and **Entity Framework for database operations**.

RESTful Web APIs

I have extensive experience in designing and developing multiple RESTful Web APIs using ASP.NET MVC Web API to facilitate seamless communication between the frontend and backend. These APIs have been structured to ensure scalability, security, and efficiency while handling data exchange between client applications and the server. Additionally, I have worked with various data formats such as JSON and XML, integrating them with frontend frameworks and third-party services to build dynamic and responsive applications.
