Experience

Software Engineer

aSimplify

Full Time, On-site, Islamabad

04/2024 - Current

- Developed and maintained responsive, high-quality frontend interfaces using JavaScript (JS) and modern frameworks (i.e., Next, Vue.js, React), contributing to diverse projects and full-stack solutions with ASP.NET Core MVC.
- Worked and enhanced a Chrome extension using JavaScript, integrating AI-driven features powered by OpenAI and Gemini to optimize system configurations and improve user workflows.
- Maintain scalable, JS-driven web applications widely utilized in live market environments, ensuring top-tier performance and reliability through frontend optimizations and seamless backend integration.
- Optimized JS-based web application performance, focusing on frontend scalability and responsiveness to ensure reliability in high-traffic live market scenarios.
- Guided junior developers and interns, sharing JavaScript expertise and best practices to ensure efficient delivery of frontend and extension-based projects.
- Collaborated with cross functional teams including design and marketing, to create comprehensive onboarding processes detail videos.

Stem Wizards
Academia

Full Time, Hybrid, Abbottabad

09/2023 - 12/2023

Frontend Developer

- Led the development and deployment of the AirAcademic LMS system as the lead Frontend Engineer, utilizing JavaScript to create a robust, user-friendly interface for a widely-used educational platform.
- Translated complex requirements into intuitive UI designs using JavaScript, crafted mobile-responsive features, and collaborated with teams to enhance usability and meet user needs effectively.
- Worked in a hybrid capacity, balancing on-site and remote responsibilities to deliver frontend solutions for the AirAcademic system and related projects.

MERN Stack Trainee

Contour Software

Full Time, on-site, Islamabad

04/2023 - 06/2023

- Gain hands-on expertise in MERN Stack development under the guidance of top market developers.
- Participate in a training program sponsored by TECH Lift, designed to enhance technical and professional skills.
- Earn a certification from Contour Software upon successful completion of the training program.
- Learn current market trends and best practices in software development, focusing on the MERN Stack (MongoDB, Express.js, React, Node.js).

Projects

Remote HMS System

04/2023- 06/2023

- Developed a comprehensive remote healthcare management system using the **MERN Stack**.
- Implemented **Stripe** payment gateway for seamless transactions, supporting various payment methods
- Enabled users to consult with doctors and schedule private appointments conveniently.
- Developed an intuitive **dashboard** for admin and doctors, providing key insights through graphs and metrics.
- Implemented admin-exclusive features like doctors management and other configurations.

Asaan Movers

03/2022 - 12/2022

- Logistic Application with **real-time tracking**, build by using React.js, Express.js, Node.js and MongoDB (MERN Stack).
- Implemented front-end functionality with React.js for a responsive and dynamic user interface.
- Integrated MongoDB for efficient data storage and real-time tracking and **route optimization** capabilities.

Skills

- C | C++ | Java | HTML | CSS | JavaScript | Bootstrap | Tailwind CSS | Flowbite CSS | jQuery | Ajax | Alpine JS | Azure DevOps | Chakra UI
- NEXT | React | NUXT | MS SQL | PostgreSQL | Node.js | Express.js | MongoDB | Git | Frontend | Backend | Performance Optimization
- GCP | AWS S3 | Docker | Generative AI | LangChain | Llama Index | Ollama | Web Scraping | Web Automation | Desktop Automation

Education

Bachelor of Science

COMSATS UNIVERSITY

Abbottabad, Paskitan

03/2019 - 07/2023

- Major in Software Engineering (3.32 CGPA)
