SUMMARY

I am a dedicated software developer with expertise in full stack web development, particularly in the MERN stack with next js framework. This includes both frontend and backend development, as well as working with SQL and NoSQL databases.

Additionally, I have experies in android app development in Kotlin, which further broadens my skill set. My passion for technology and continuous learning drives me to create efficient and innovative solutions. Working on a variety of projects allowed me to hone my skills in frontend and backend development, utilizing technologies such as MongoDB, Express.js, React, and Node.js.'ve gained proficiency in developing APIs and integrating them with frontend applications.

EXPERIENCE

Full-Stack Developer

Spectrum

📅 2022 - 2023 📍 Remote

- Built a comprehensive eye testing website using the MERN stack.
- Implemented secure user login, registration, and role-based access control using JWT.
- Enhanced skills in React.js by creating dynamic user interfaces, managing component state, and improving user experience through optimized rendering.
- Designed and optimized database schemas for efficient storage and retrieval of test results using MongoDB.
- Developed RESTful APIs for managing test data, user profiles, and test results using Node.js and Express.
- Used tools like Postman for API testing and validation, ensuring all endpoints work as expected.
- Implemented performance optimizations on both frontend and backend, including lazy loading and efficient API queries.

EDUCATION

Bachelor of Science in Software Engineering

COMSATS University Islamabad

📅 2020 - 2024

INTERNSHIP

Frontend Developer

stem-wizards academia

📅 2023

complete internship at Stem-Wizardz software house located at abbottabad in 2023 as a frontend web developer, duration of 4 months.

PROJECTS

Freelaunce Projects

As a freelance developer, I have successfully completed a range of projects, including building a fully functional eCommerce website. This involved implementing product catalogs, managing user authentication, and creating a seamless shopping experience. I gained valuable experience in full-stack development, collaborating with clients, and delivering high-quality, scalable solutions tailored to meet business needs

Education Website

I have designed and developed the frontend of an education website using modern web technologies. The site includes interactive user interfaces, responsive design, and seamless navigation, enhancing the overall user experience.

Spectrum

Spectrum is an eye testing website developed using the MERN stack, designed to provide users with real-time oppointments. The platform focuses on accessibility and performance, offering a user-friendly interface for conducting vision tests efficiently.

KEY ACHIEVEMENTS

Optimized Performance

Improved Website performance by reducing page load times by 30% using caching strategies, lazy loading, and efficient code structuring and proper state management.

Ecommerce Sites

Developed a fully functional eCommerce platform, integrating features such as product catalogs, payment gateway integration, and user authentication.

React Native Apps

Worked with React Native to build responsive mobile applications integrated with Firebase.

SKILLS

Javascript

React JS

Node JS

Java

Mongoddb

OOP

Firebase

SQL

Tailwind CSS

JQuery

Redux

React Hooks

Restfull API's

NEXT JS

aws

SSR

UI/UX design
