Summary

Aspiring Data Scientist and Database Administrator with a strong academic foundation in Computer Science and hands-on experience in data analysis, machine learning, and database optimization. Proven ability to leverage tools like Python, SQL, and Power BI to solve real-world problems, particularly in healthcare and business analytics. Passionate about advancing my knowledge in data-driven decision-making and contributing to innovative research in predictive modeling and database systems. Seeking a master's degree to further develop my expertise and make a meaningful impact in the field of data science.

Education

University of Swabi

CGPA: 3.5/4

Bachelor of Computer Science

Sep 2020 – Jul 2024

Glorious College of Science & Technology

Percentage: 79%

Pre-Engineering

Aug 2018 – May 2020

Professional Experience

Database Administrator

ObsidianPM – Abbottabad, Pakistan

Dec 2024 – Present

- Designed and deployed healthcare database schema for the ObsidianPM project, ensuring scalability and efficiency.
- Optimized SQL queries, stored procedures, triggers, and views to meet dynamic project requirements and improve query performance.
- Implemented MySQL InnoDB Cluster for disaster recovery and high availability, ensuring minimal downtime.
- Configured MySQL Master-to-Master and Client-to-Master replication for load balancing and performance optimization.
- Monitored database performance, resolved bottlenecks, and ensured smooth operations during peak loads.
- Collaborated with cross-functional teams to deliver database solutions within tight deadlines.

Data Science Intern

MeriSkill (Remote)
Jul 2024 – Oct 2024

- Conducted sales trend analysis and developed interactive Power BI dashboards with slicers and filters for data-driven decision-making.
- Built a diabetes prediction model using logistic regression and visualized key insights for stakeholders.
- Created HR analytics dashboards to analyze attrition rates, job roles, and demographic factors.
- Cleaned and transformed datasets, addressing missing values and ensuring data quality for accurate reporting.

Data Analysis Intern

PlacementDost (Remote)
Feb 2024 – Apr 2024

- Designed and populated SQL databases, implemented dynamic stored procedures, and optimized queries for efficient data retrieval.
- Developed interactive Power BI dashboards with drill-down functionality and geographic analysis.
- Performed data analysis in Excel using pivot tables, conditional formatting, and advanced formulas to uncover key insights.

Independent Projects

1. Price Prediction System

- Developed a machine learning-based house price prediction application using Streamlit.
- Designed a user-friendly interface for seamless interaction, allowing users to input features (e.g area, bedrooms) and receive real-time predictions.
- Predicted house prices using a trained machine learning model, providing accurate and reliable estimates.

2. Health Risk Prediction

- Designed a health risk prediction system using a decision tree model to classify risks like Heart Disease, Diabetes, Osteoporosis (High/Not High Risk), and No Significant Risk.
- Built an interactive Streamlit application for real-time predictions.
- Implemented Preprocessing pipelines for scaling and feature encoding to ensure model accuracy

3. Hotel Booking Analysis

- Analyzed booking data using Python, Pandas, and Matplotlib.
- Found higher prices and longer waits increase cancellations.
- Resort hotels had more cancellations than city hotels.
- Average daily rate peaked in January and July.

4. Animated Movies Analysis

- Analyzed animated movies using Python, Pandas, and Matplotlib.
- Explored popularity, revenue trends, production countries, and top-grossing companies.
- Visualized insights to uncover trends in box office performance and genres.

Skills

Programming Languages:

Python, SQL, JavaScript, HTML/CSS

Database Management:

MySQL, MS SQL Server, SQL Server Management Studio, Adminer

Data Analytics & Visualization:

Power BI, Excel (Advanced Functions, Dashboards)

Libraries:

Pandas, NumPy, Matplotlib, Seaborn

Machine Learning & Preprocessing:

Logistic Regression, Decision Trees, Train-Test Split, Data Cleaning, Handling missing values, feature scaling, label encoding

Statistical Analysis:

Hypothesis testing, correlation analysis, trend analysis

Version Control:

Git, GitHub

Frameworks & Tools:

Streamlit, WordPress, Jupyter Notebook, VS Code

Research Skills:

Research Methodology, Academic Writing, Literature Review, Data Collection Tools

Additional Skills:

Time Management, Effective Googling for Technical Solutions, Team Collaboration & Communication, Critical Thinking, Adaptability and Leadership

Awards & Certifications:

- Awarded the PM's National Laptop Scheme (2023) for academic excellence.
- Ranked 4th in my batch during Bachelor of Computer Science at the University of Swabi.
- Python for Data Science, AI & Development – Coursera
- Programming with Python – Coursera
- What is Data Science – Coursera
- Introduction to Software Project Management – Coursera
- Meta Front-End Development Specialization – Coursera

LANGUAGES

- English (Professional Working Proficiency)
- Urdu (Professional Working Proficiency)
- Hindi (Conversational Proficiency)
- Pashto (Native Proficiency)
